

## Q1. The Farmer's Puzzle

I picked 8, 5 and 2 from my farm. I want to form the smallest 3-digit number using these digits. I will use each digit only once.

8	5	2	

Your job:

Help Farmer to write the number he formed in the Middle row. Then, subtract all three numbers to find the total and write the total in the last row.

## Q2. The Confused Durva's Puzzle

**Help me!**

*To Form Great 3  
digit number and  
small 3 digit number  
using 8, 4, 0. Use  
each digit only once.*

--	--	--

*First ROW*

--	--	--

*Second Row*

--	--	--

Your job:

Help confused Durva to write the Great number in First row and Small number in Second row she formed. Then, subtract both Great and Small numbers to find the total and write it in the last row.
