

Teacher: Fraymar Hernández

Subject: Social Studies

Student's name: \_\_\_\_\_

## CLASS ACTIVITY

### The Pacific Ring of Fire

The Pacific Ring of Fire is an area around the Pacific Ocean. In this place, there are many volcanoes and earthquakes occur.

**Why does this happen?**

Because the Earth is made of big pieces called plates.

When the plates move, the ground shakes or volcanoes erupt.

The Pacific Ring of Fire has most of the world's volcanoes. Countries like Ecuador, Japan, and Chile are part of this area.

Volcanoes and earthquakes can be dangerous, but they also show us that nature is very powerful.

### 1. Reading Comprehension

Answer the questions with a short phrase:
