Subject:	Organic Gardening	Plain Text

Arial   10   **B** *I* <u>U</u>

Hi Ain,

How are you? Remember you have asked me about organic gardening and its benefit? So now I'm going to **(0)** <u>sharing</u> with you. No matter where you go today, people are talking about organic food. Organic gardening is the best way **(9)** <u>from</u> home gardening. It is an environmentally friendly way of gardening. Organic gardening **(10)** <u>having</u> lots of advantages. Firstly, organic gardening provides delicious chemical-free food while **(11)** <u>respects</u> the environment. An organic garden is free **(12)** <u>for</u> toxic chemicals like chemical fertilisers, pesticides and herbicides. The organic food items are rich **(13)** <u>on</u> nutritional values. Secondly, organic gardening uses **(14)** <u>least</u> natural resources especially water. The soil is fertilised through composting. This is good for the environment **(15)** <u>until</u> less waste is discarded. Furthermore, planting your own organic vegetable garden will **(16)** <u>saving</u> your money. That is something we all want to do. By growing your own vegetables, you will save money at the store and also can get a sense of fulfilment from harvesting your own garden. Happy gardening!
