

Part 2**Questions 9 to 16**

Read the text below and correct the underlined errors.

For each question, write the correct word in the space provided on your answer sheet.

Recently, NASA (0) succeeded (9) launching the Space Launch System rocket (10) who is the most powerful rocket in the making. This allows the Orion to (11) breaking free of Earth's gravity to explore the Solar System. The Orion is NASA's new powerful spacecraft designed to carry humans to (12) far destinations such as the Moon and Mars.

This historical launch is one of the first major steps (13) on the Artemis mission towards putting humans back on the Moon in almost 50 years since Neil Armstrong. This first flight has been about testing the engines (14) or systems in the absence of astronauts as part of the Artemis 1 programme. In Artemis 2, the astronauts will get (15) them chance to fly the Orion but Artemis 3 is the most highly (16) anticipating because it will be an attempt to land people on the Moon again which could be happening in 2025 or 2026.

Example:

0	successfully
---	--------------

Answers:

9		10		11		12	
13		14		15		16	

[8 marks]
