**Question 32:** A. other      B. another      C. lot of      D. few

**Question 33:** A. when      B. where      C. who      D. which

**Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the questions.**

Mental health issues such as anxiety and depression were a leading cause of global health problems even before the spread of COVID-19; however, they've gotten worse. Since the first year of the COVID-19 pandemic, anxiety and depression rates worldwide have increased by an overwhelming 25%. In the U.S, 4 in 10 adults have reported symptoms of anxiety or depression during the pandemic, compared with 1 in 10 from January to June 2019.

Among the most affected are young adults and women. The surge in people struggling with mental illnesses has coincided with gaps in mental care services as well.

Research suggests that the pandemic has exacerbated the impacts of loneliness. Additionally, people's fear of missing out, also known as FOMO, hasn't decreased even since in-person social gatherings became less frequent. But small daily actions - such as a short walk, break from social media or even a catnap - can add up to have an impact on mental health. Separately, counselling, therapy and medication prescribed by health care providers are effective treatments for those experiencing mental illness.

**Question 34:** Which of the following can be the best title for the passage?

A. How to Handle Mental Illness      B. Mental Health - an Alarming Issue

**Question 35:** The word “they” in paragraph 1 refers to \_\_\_\_\_.

A. global health problems B. symptoms C. mental health issues D. adults

**Question 36:** The word “surge” in paragraph 2 is closest in meaning to \_\_\_\_\_:

**Question 37:** According to paragraph 1, which of the following is TRUE?

- A. Mental illness is not a worldwide problem.
- B. The rates of anxiety and depression experienced an increase by 25% in the first year of COVID-19.
- C. 4 in 10 adults in the US show symptoms of depression and anxiety before June 2019.
- D. Mental health issues have not changed since COVID-19.

**Question 38:** Which of the following is NOT true according to the passage?

- A. The influences of loneliness got worse during the pandemic.
- B. There are many kinds of treatments to tackle mental health issues.
- C. Even though now there are fewer in-person social meetings, the number of people having FOMO has not reduced.
- D. Young adults and men are the highest number of people suffering from mental illnesses.

**Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the questions.**

The average daily time spent online by adults increased by nearly an hour during the UK's spring lockdown when compared to the previous year, according to communications regulator Ofcom, with numerous countries back under severe pandemic restrictions, many of us once again find ourselves questioning whether our heavy reliance on technology is impacting our health.

It's true that digital devices have provided new means of work, education, connection, and entertainment during lockdown. But the perceived pressure to be online, the tendency to procrastinate to avoid undertaking tasks, and the use of digital platforms as a way to escape stress all have the potential to turn healthy behaviours into habits. This repetitive use can develop into addictive patterns, which can in turn affect a user's wellbeing.

Digital addiction refers to the addictive and excessive use of digital devices. The design of digital platforms themselves contributes to this addictive use. Notifications, news feeds, likes and comments have all been shown to contribute towards a battle for your attention, which leads users to increase the time **they** spend looking at screens.

Screen time is an obvious measure of digital addiction, although researchers have noted that there is no simple way to determine how much screen time one can experience before it becomes problematic. As such, there is a continued lack of **consensus** on how we should think about and measure digital addiction.

During a global pandemic, when there often feels like no alternative to using Netflix, or video conferencing with friends and family, screen time as an indicator of digital addiction is clearly ineffective. Nonetheless, research conducted on preventing digital addiction does provide insights on how we can all engage with our digital technologies in a healthier way during a lockdown.

**Question 39:** Which of the following can be the best title for the passage?

A. Digital Addiction During Pandemic Lockdown      B. The Effect of Covid-19 Lockdown  
C. Forms of Digital Entertainment      D. Research about Digital Addiction

**Question 40:** The word “procrastinate” in paragraph 2 is closest in meaning to
