 - a. Improves quality of human life and increase work efficiency
 - b. Creation of new technologies that are more intelligent and closer to humans
 - c. Sharing of customs and beliefs among people around the world.

8. What is the positive impact of technological change on humans based on progress of science?
 - a. Improves quality of human life and increase work efficiency
 - b. Creation of new technologies that are more intelligent and closer to humans
 - c. Sharing of customs and beliefs among people around the world.
9. What is the negative impact of technological change on humans based on progress of science?
 - a. Humans are using computers more and more making in so much usage of electricity and affects the eyesight.
 - b. The use of intelligent technology to replace human labor led to elimination of the need for human labor.
 - c. Not learning the differences among nations may create conflict in society
10. What is the negative impact of technological change on humans based on the needs of society?
 - a. Humans are using computers more and more making in so much usage of electricity and affects the eyesight.
 - b. The use of intelligent technology to replace human labor led to elimination of the need for human labor.
 - c. Not learning the differences among nations may create conflict in society
11. What is the negative impact of technological change on humans based on cultural change?
 - a. Humans are using computers more and more making in so much usage of electricity and affects the eyesight.
 - b. The use of intelligent technology to replace human labor led to elimination of the need for human labor.
 - c. Not learning the differences among nations may create conflict in society
12. What is the positive impact of technological change on the economy based on finance and accounting?
 - a. Produces more products for it uses less production cost, resulting more profit.
 - b. Wider market, resulting more products being sold and more profit for sellers.
 - c. Multiple online payment methods making paying convenient without having to travel.
13. What is the positive impact of technological change on the economy based on marketing and sales?
 - a. Produces more products for it uses less production cost, resulting more profit.
 - b. Wider market, resulting more products being sold and more profit for sellers.
 - c. Multiple online payment methods making paying convenient without having to travel.
14. What is the positive impact of technological change on the economy based on production?
 - a. Produces more products for it uses less production cost, resulting more profit.
 - b. Wider market, resulting more products being sold and more profit for sellers.
 - c. Multiple online payment methods making paying convenient without having to travel.
15. What is the negative impact of technological change on the economy based on production?
 - a. Competition in industrial production may lead to wasteful use of natural resources.
 - b. Selling online can lead to scammers who sells low-quality products and selling illegal products.
 - c. Not having a good payment security system causing loss of funds.

16. What is the negative impact of technological change on the economy based on finance and accounting?
 - a. Competition in industrial production may lead to wasteful use of natural resources.
 - b. Selling online can lead to scammers who sells low-quality products and selling illegal products.
 - c. Not having a good payment security system causing loss of funds.
17. What is the negative impact of technological change on the economy based on marketing and sales?
 - a. Competition in industrial production may lead to wasteful use of natural resources.
 - b. Selling online can lead to scammers who sells low-quality products and selling illegal products.
 - c. Not having a good payment security system causing loss of funds.
18. What is the positive impact of changes in environmental technology?
 - a. Produces more products for it uses less production cost, resulting more profit.
 - b. Controlling the environment to meet the needs of society.
 - c. Industrial production which leads pollution problems.
19. What is the negative impact of changes in environmental technology?
 - a. Controlling the environment to meet the needs of society.
 - b. Industrial production which leads pollution problems.
 - c. Multiple online payment methods making paying convenient without having to travel.
20. As a student, how can you help save the environment by using technology?
 - a. Throwing trashes on the trash bin.
 - b. Using of light which uses solar energy to save consumption of electricity which helps environment.
 - c. Charging phone for long time even the battery is already full.

Explain substantially in your own words and give lengthily reason what is asked.

: Analyze the advantages and disadvantages of technology and explain how the technology works and how it can be used to create benefits.

1. mobile phone

Advantages of mobile phone	Disadvantages of mobile phone

2. computer

Advantages of computer	Disadvantages of computer
