

ASYNCHRONOUS CLASS ASSIGNMENT - CHEMISTRY

Name: _____

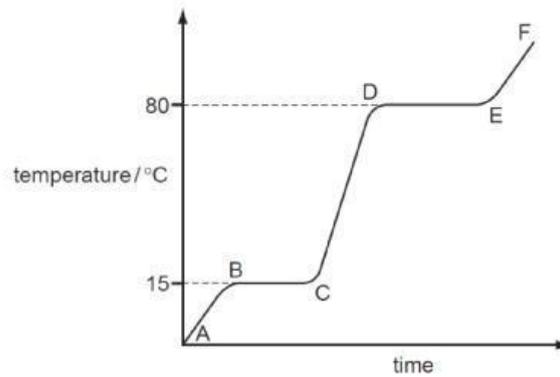

Class: _____

No	Questions																																			
1	<p>Separate: Chemistry and Extended Only</p> <p>The following table gives information about six substances.</p> <table border="1" style="width: 100%; border-collapse: collapse; margin: 10px 0;"> <thead> <tr> <th style="width: 15%;">Substance</th> <th style="width: 15%;">melting point / °C</th> <th style="width: 15%;">boiling point / °C</th> <th style="width: 20%;">electrical conductivity as a solid</th> <th style="width: 35%;">electrical conductivity as a liquid</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">A</td> <td style="text-align: center;">839</td> <td style="text-align: center;">1484</td> <td style="text-align: center;">good</td> <td style="text-align: center;">good</td> </tr> <tr> <td style="text-align: center;">B</td> <td style="text-align: center;">-210</td> <td style="text-align: center;">-196</td> <td style="text-align: center;">poor</td> <td style="text-align: center;">poor</td> </tr> <tr> <td style="text-align: center;">C</td> <td style="text-align: center;">776</td> <td style="text-align: center;">1497</td> <td style="text-align: center;">poor</td> <td style="text-align: center;">good</td> </tr> <tr> <td style="text-align: center;">D</td> <td style="text-align: center;">-117</td> <td style="text-align: center;">78</td> <td style="text-align: center;">poor</td> <td style="text-align: center;">poor</td> </tr> <tr> <td style="text-align: center;">E</td> <td style="text-align: center;">1607</td> <td style="text-align: center;">2227</td> <td style="text-align: center;">poor</td> <td style="text-align: center;">poor</td> </tr> <tr> <td style="text-align: center;">F</td> <td style="text-align: center;">-5</td> <td style="text-align: center;">102</td> <td style="text-align: center;">poor</td> <td style="text-align: center;">good</td> </tr> </tbody> </table>	Substance	melting point / °C	boiling point / °C	electrical conductivity as a solid	electrical conductivity as a liquid	A	839	1484	good	good	B	-210	-196	poor	poor	C	776	1497	poor	good	D	-117	78	poor	poor	E	1607	2227	poor	poor	F	-5	102	poor	good
Substance	melting point / °C	boiling point / °C	electrical conductivity as a solid	electrical conductivity as a liquid																																
A	839	1484	good	good																																
B	-210	-196	poor	poor																																
C	776	1497	poor	good																																
D	-117	78	poor	poor																																
E	1607	2227	poor	poor																																
F	-5	102	poor	good																																
	<p>a Which substances are solids at room temperature? Answer:</p>																																			
	<p>b Which substance could be a metal? Answer:</p>																																			
	<p>c Which substance is an ionic compound? Answer:</p>																																			
	<p>d Which substances are liquids at room temperature? Answer:</p>																																			
2	<p>Complete Table 1.1 about solids, liquids and gases.</p> <p style="text-align: center;">Table 1.1</p> <table border="1" style="width: 100%; border-collapse: collapse; margin: 10px 0;"> <thead> <tr> <th style="width: 15%;"></th> <th style="width: 25%;">particle separation</th> <th style="width: 25%;">particle arrangement</th> <th style="width: 35%;">type of motion</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">solid</td> <td></td> <td style="text-align: center;">regular</td> <td style="text-align: center;">vibrate only</td> </tr> <tr> <td style="text-align: center;">liquid</td> <td style="text-align: center;">some touching</td> <td></td> <td style="text-align: center;">random</td> </tr> <tr> <td style="text-align: center;">gas</td> <td style="text-align: center;">apart</td> <td style="text-align: center;">random</td> <td></td> </tr> </tbody> </table>		particle separation	particle arrangement	type of motion	solid		regular	vibrate only	liquid	some touching		random	gas	apart	random																				
	particle separation	particle arrangement	type of motion																																	
solid		regular	vibrate only																																	
liquid	some touching		random																																	
gas	apart	random																																		

3

a

The diagram shows a heating curve for a sample of compound X.

Is X a solid, a liquid or a gas at room temperature, 20 °C?

Answer:

b

Name the change of state which occurs in region DE.

Answer:

4

Explain the following in terms of the kinetic particle theory.

A liquid has a fixed volume but takes up the shape of the container. A gas takes up the shape of the container but it does not have a fixed volume.

Answer:
