- If you eat too much candy, _____.
- If my team wins, _____.
- If I don't finish my homework, _____.
- If we travel to the beach, _____.
- If you help me, _____.

**5. Reading comprehension****Schools in the Future**

In the future, schools will be very different from today. Students will not sit in traditional classrooms with blackboards. Instead, they will learn in smart classrooms with large interactive screens and virtual reality. Teachers will use technology to explain lessons in a more exciting way.

Students will not carry heavy backpacks. All the books will be digital, and they will use tablets or even holograms. Learning will be faster because artificial intelligence will help each student with their personal needs.

In the future, students will also travel less because many classes will be online. They will meet classmates from other countries and practice languages with them. Schools will not only focus on academic subjects; they will also teach students how to take care of the environment, how to be healthy, and how to work as a team.

Even though technology will be important, teachers will not disappear. They will still guide students, motivate them, and help them solve problems. Schools in the future will be more creative, more global, and more connected than ever before.

**Questions****Multiple Choice (choose the best answer):**

1. In the future, students will study in:
 - a) Traditional classrooms
 - b) Smart classrooms
 - c) Parks
 - d) Libraries
2. What will replace heavy backpacks?
