Computer Games

Star City

Star City is a city-building game available for X-box, PlayStation, and Windows PC. Players have to build and look after a city in the future on another world. They have to decide what to do in an ever-changing city and be sure that the city and its people have everything they need to live. There are lots of problems and difficult things for the players to do but this makes the player think carefully so that they can make the best decision. This will probably help them in the real world. Players must be over eighteen years old to play this game.

Fast Drive

Fast Drive is a game that has lots of dangerous driving in it. Players are rewarded for driving on the wrong side of the road, driving into other cars or motorbikes, and creating problems all over a city. Parents of new teenage drivers might want to think about the fact that playing some racing games can make their children want to drive in such a way in real life. This game also has an online part that allows for chat, so each player will hear everything that other online players say.

Dinosaurs

What kid hasn't thought about how much fun it would be to have a pet dinosaur as a best friend, or maybe to go for a ride on the back of a fire-eating animal? *Dinosaurs* is perfect for children aged between 10 and 14. The players work with dinosaurs that they have found. The game is all about becoming friends with your dinosaur and it is like going on an adventure with a loved family pet that has big teeth. Sometimes the player has to repeat some actions too many times, which might be a bit boring, but most of the game is interesting.
