19. According to the writer, The importance of "pixel resolution" decides the quality of image.

20. When you save a file, the operating system moves the read/ write heads of the disk drive towards empty sectors, records the data and writes an entry for the directory.

21. When you open the file, the operating system looks for its entry in the directory on the disk, moves the read/ write heads to the correct sectors, and reads the file into the RAM area.

22. If you only use word- processing programs, you will need less storage capacity than if you use CAD.

23. Microcomputers make use of two types of main memory: RAM and ROM, both contained in electronic chips connected to the mainboard of the computer.

24. RAM is the working area of the computer, that is the basic location where the microprocessor stores the required information.

25. We use these units (KB, MB, GB) to describe the RAM memory, the storage capacity of disks and the size of any application or dorcument.

26. the advantages of the computer mouse over the keyboard are
   - it is very quick way to move around on a screen
   - The mouse also issues instructions to the computer very quickly
   - Mice are so widely used in graphics applications.
