Let's answer – How is AI different from humans?

Name: **Class:**

Description	Human	AI
1- Learns by looking at lots of data and patterns		
2- Can learn on their own and ask questions to understand better.		
3- Can do some tasks very fast, like sorting pictures or solving math problems.		
4- Maybe slower at some tasks but can understand meaning and context better.		
5- Cannot make decision on its own without rules or data.		
6- Does not have feelings or emotions, so it is bad at tasks that require showing empathy.		
7- Have feelings and emotions that affect how they think and act.		
8- Learn in many ways: by reading, listening, watching, and talking to others.		
9- Needs to be trained by humans to work well.		
10- Can make choices based on experience, feelings and values.
