

## Reading a Bar Graph

Name: \_\_\_\_\_

An ice cream store kept track of the different flavored ice cream cones they sold in a day. They recorded the results in the bar graph below. Use their graph to answer the questions.

- 1) How many vanilla cones were sold?
- 2) Were there more vanilla or mint cones sold?
- 3) Were there fewer chocolate or orange cones sold?
- 4) Which flavor sold exactly 3 cones?
- 5) Which flavor sold the most?
- 6) Which flavor sold the least?
- 7) How many more chocolate cones were sold than vanilla?
- 8) How many cotton candy cones were sold then mint?
- 9) How many total cones were sold?
