

WORD PROBLEMS ON ADDITION AND SUBTRACTION

1. Gina has 4 apples. She eats 3 of them. How many apples left?
2. Lucy has 15 sticks for camping. She gets 7 more. How many sticks altogether?
3. Mrs. Candy is taking attendance of her class. There are 14 students. 5 more students come. How many students altogether? 

CHALLENGER:

Lilly has a bag of flour. It weighs 1kg. She puts it in her scale and gets a 5kg box. She measures it but the box is heavier than the bag of flour. How many less should the box be to make it equal?
