

CONVERTING KILOMETRE (M) TO METER (M)

Important note:

$$1 \text{ km} = 1000 \text{ m}$$

2 km = _____ m	7.3 km = _____ m	$\frac{9}{10}$ km = _____ m
$2 \times 1000 = \underline{2000 \text{ m}}$	$7.3 \times 1000 = \underline{7300 \text{ m}}$ $7.3 \text{ } \underline{00}.$	$\frac{9}{10} \times 1000 = \underline{900 \text{ m}}$

Now, you try.

km	m
28 km	28 000 m
53.39 km	m
$\frac{4}{100}$ km	m
0.67 km	m
3 km	m
0.052 km	m
