

Transport through time

Drag the icons of transport into the correct box to show the representation of transport through time

The diagram consists of a horizontal timeline with five circular markers. Below each marker is a large, empty rectangular box with a blue border, intended for a transport icon. Below these boxes are five smaller icons, each in its own box: a wooden cart, a bicycle, a steam train, a camel and horse, and a red car. The boxes for the cart, bicycle, and train have blue borders, while the camel/horse and car boxes have black borders.
