WEB BROWERS AND SEARCH ENGINES

WEB BROWSERS

A web browser is an application that shows information on the web. It may show information like webpages, videos, images, and other files. It has an address bar that you would type the address or URL of the website that you would like to go to.

Some web browsers are Explorer, Chrome, Mozilla Firefox, Safari, Bing, Edge, and Opera.

The most popular web browser used is **Chrome**.

SEARCH ENGINES

A search engine is a program that **gets** web sites, pictures, videos, news, maps, and other information that you want to find on the web. The search engine is inside the browser. It has a **search bar** that you would type keywords for you to do a search for websites that have those key words in them.

Some search engines are Google, Yahoo, MSN, and Duck Duck Go.

The most popular search engine is **Google.**

Here are three differences between a search engine and a web browser.

1. A web browser **puts you on** the internet. A search engine allows you to **search the internet** once you have access to it.

2. A web browser has an **address bar** for you to go to a specific website. A search engine has a **search bar** for you to search for webpages that have the information that you are looking for.
