

1. What is the purpose of internal and external structures in plants and animals?	<ul style="list-style-type: none"> <li>a) Only for decoration</li> <li>b) Solely for attracting mates</li> <li>c) To function together in a system for survival, growth, behavior, and reproduction</li> <li>d) Simply for creating diversity</li> </ul>
2. Which of the following is an example of an internal structure in an animal?	<ul style="list-style-type: none"> <li>a) Fur</li> <li>b) Gills</li> <li>c) Scales</li> <li>d) Feathers</li> </ul>
3. How do internal and external structures in plants and animals work together?	<ul style="list-style-type: none"> <li>a) They don't work together</li> <li>b) Independently of each other</li> <li>c) In a system to support survival, growth, behavior, and reproduction</li> <li>d) Only during certain seasons</li> </ul>
4. What is the external structure in a plant that helps it absorb sunlight for photosynthesis?	<ul style="list-style-type: none"> <li>a) Roots</li> <li>b) Leaves</li> <li>c) Stems</li> <li>d) Flowers</li> </ul>
5. Which internal structure helps animals breathe underwater?	<ul style="list-style-type: none"> <li>a) Lungs</li> <li>b) Gills</li> <li>c) Heart</li> <li>d) Stomach</li> </ul>
6. What is the primary function of external structures in animals?	<ul style="list-style-type: none"> <li>a) Only for protection</li> <li>b) For camouflage</li> <li>c) To support survival, growth, behavior, and reproduction</li> <li>d) Strictly for attracting mates</li> </ul>
7. In what way do internal structures contribute to an animal's growth?	<ul style="list-style-type: none"> <li>a) By changing colors</li> <li>b) By producing sounds</li> <li>c) By providing support and nutrients</li> <li>d) By attracting other animals</li> </ul>
8. Which of the following is an external structure in a bird that aids in flying?	<ul style="list-style-type: none"> <li>a) Claws</li> <li>b) Beak</li> </ul>

	<ul style="list-style-type: none"> <li>c) Feathers</li> <li>d) Wings</li> </ul>
9.	<p>How do internal structures in animals contribute to their behavior?</p> <ul style="list-style-type: none"> <li>a) By influencing their choice of food</li> <li>b) By determining their size</li> <li>c) By controlling the color of their fur</li> <li>d) By regulating their body temperature</li> </ul>
10.	<p>Which of the following is an example of an external structure in a plant?</p> <ul style="list-style-type: none"> <li>a) Roots</li> <li>b) Stems</li> <li>c) Chloroplasts</li> <li>d) Xylem</li> </ul>
11.	<p>Why is it important for internal and external structures to function together in a system?</p> <ul style="list-style-type: none"> <li>a) Just for fun</li> <li>b) To confuse predators</li> <li>c) To support survival, growth, behavior, and reproduction</li> <li>d) Only during specific times of the day</li> </ul>
12.	<p>Which internal structure in animals plays a crucial role in the circulation of blood?</p> <ul style="list-style-type: none"> <li>a) Stomach</li> <li>b) Heart</li> <li>c) Lungs</li> <li>d) Liver</li> </ul>
13.	<p>What external structure in animals is primarily responsible for protecting their body?</p> <ul style="list-style-type: none"> <li>a) Fur</li> <li>b) Scales</li> <li>c) Skin</li> <li>d) Feathers</li> </ul>
14.	<p>How do external structures in plants contribute to their reproduction?</p> <ul style="list-style-type: none"> <li>a) By regulating temperature</li> <li>b) By attracting insects for pollination</li> <li>c) By providing nutrients</li> <li>d) By producing oxygen</li> </ul>
