

TEXT 2: Why Platypus Looks So Strange

1. Why do you think the Creator decided to make the animals look different from each other?

- A. Because she wanted to make them more beautiful.
- B. Because it was hard to tell them apart when they all looked the same.
- C. Because the animals asked her to change their looks.

☐

2. What might this story suggest about Platypus's personality or habits?

- A. He prefers staying underwater and doesn't pay much attention to what happens on land.
- B. He likes to attend meetings and learn new things.
- C. He is always the first to know what's going on.

☐

3. Why do you think some animals pretended to be others?

- A. Because they wanted to make the Creator happy.
- B. Because they liked to play tricks and confuse others.
- C. Because they didn't know who they really were.

☐

4. How might Platypus have felt when he realized he was the only one who didn't attend the meeting?

- A. Happy that he didn't have to go.
- B. Angry at the Creator for not inviting him.
- C. Left out and surprised that no one told him about it.

☐

5. Why did Platypus decide to visit the Creator after seeing Fish's new appearance?

- A. Because he wanted to congratulate Fish.
- B. Because he realized something had changed and wanted to understand why.
- C. Because he was angry that Fish looked better than him.

☐

6. What can we infer about the Creator's feelings when she saw Platypus?

- A. She felt sorry for forgetting about him.
- B. She was proud of how he looked.
- C. She didn't care much about him.
