How are you blow-drying your hair?

STEP 1

I am starting with towel dried hair. I am dispensing 4 pumps of Sunsilk Blow-Drying Aid Mousse into my hands.

STEP 2

I am sweeping my comb through the mousse and then I am combing it evenly through my hair, one section at a time.
Remember to always be gentle with damp hair.

STEP 3

I am bending over, and with my head upside down, I am using my hairdryer to rough dry my hair until almost dry. It should still feel slightly cool and damp to the touch. It's much easier to blow-dry with a brush when your hair is nearly dry - it shapes more easily.

STEP 4

Now I am starting to blow-dry with a brush.

STEP 5

Hair will style more easily the more times you blow-dry it into that particular style
