

## Why Sport Is Good for Our Minds and Body

Playing sports is not just fun—it also helps our minds and bodies in many important ways. Sports give us the chance to improve our physical fitness, build friendships, and learn teamwork. Regular sport activities help us develop a strong body, increase our concentration, and reduce stress. When we play sports, we learn important lessons about discipline, leadership, and responsibility. These skills can help us in school and in everyday life. Whether you play on a team or just for fun, sports can lead to a happier and healthier lifestyle.
