Heading	A. title of each paragraph
Caption	B. Shows important words
Diagram	C. Topic of the text
Bold text	D. drawing
subheading	E. shows location or where something is found
Map	F. words to describes a picture

Create a sidebar and give 2 interesting facts about Arabian Oryx.

DID YOU KNOW?

Part B: Answer the questions

The Arabian Oryx of UAE

The Arabian Oryx is the national animal of the UAE. It has a white coat that keeps it cool in the hot desert. There are several body parts that helps it survive in dessert. Its long, straight horns help protect it from predators. The Oryx has strong legs that allow it to run very fast across sand and rocky areas. Its hooves are hard and help it walk on hot sand without slipping.

Arabian Oryxes live in sandy deserts, rocky areas, and some mountains in the UAE. They eat grasses and desert plants to stay healthy. People protect them in nature reserves so they do not become endangered.

By learning about the Arabian Oryx, people understand why it is important to care for animals and the environment. Observing the oryx closely helps students notice details about its coat, horns, legs, and hooves, which are all important for surviving in the desert.
