

MY BROTHER'S JOB

This is my brother. His name is David. He's a graphics developer.

A graphics developer is a person who makes 3D games and apps using special tools like Evergine. He writes code to make things look real, to make characters move, and to make the apps work on phones and computers.

He works for a company called Plain Concepts. His office is in Sevilla Este, but he usually works from home. This is called working remotely.

Sometimes, he travels to other cities or countries to show his work or to give presentations.

When he goes to the office, he always travels by car.

He works from Monday to Friday, from eight o'clock to three o'clock. Sometimes he works longer.

When he works at home, he always wears casual clothes — sometimes even pyjamas!

He loves and enjoys his job. It's hard, but he thinks it is very interesting and important. His job makes technology better and more fun for everyone!
