POLLINATION

How flowers and bees work together!

Drag the imagees and the text into their right place

ARRIVE

Bees arrive at the flower, ready to collect **sweet pollen** and help it grow.

STICK

Pollen sticks to the bee, making it easy to carry to another flower for pollination.

ATTRACT

Flowers attract bees with bright colors and sweet scents to help them grow.

HELP OUR FLOWERS!

Plant flowers and watch the **bees come to visit!**
