Alex's Noon Rush (A Schedule Report)

Alex, the PCT on the morning shift, looks at his watch. It is 11:30 AM. He has to finish charting Ms. Perez's vitals now, as his big rush is going to start soon.

The Plan: Alex is going to go straight to Mr. Davis's room. Mr. Davis is very grumpy! Alex has to assist with feeding him exactly at 12:00 PM, or Mr. Davis gets very angry.

After lunch is the hardest part. At 1:30 PM, Alex has to transfer three patients to physical therapy. He must transfer them on time! Next, he is going to collect a urine sample from Ms. Chen before 2:00 PM.

Alex looks at the clock again. He is going to be very busy this afternoon. He reminds himself of the most important rule: I must not administer any medication! That is the nurse's job. I only have to remind the nurse about Mr. Davis's afternoon pill.

Finally, before his shift ends, Alex is going to check Ms. Perez's respirations later at 4:30 PM.

Instruction: Read the report and decide if the following statements are True (T), False (F) or Doesn't say (DS).

1	Alex has to finish charting the vitals immediately because his big rush is going to begin.	
2	Alex is going to transfer three patients to physical therapy before assisting Mr. Davis with feeding.	
3	Alex must check Mr. Davis's blood sugar level before the nurse gives him his pill.	
4	Alex has to assist with feeding Mr. Davis at 12:00 PM because the patient cannot feed himself.	
5	Alex is going to collect a urine sample from Ms. Chen right after he transfers the patients.	
6	The last action Alex is going to perform before his shift ends is checking Ms. Perez's respirations.
