

# SCIENCE AROUND US

**Across**

1. What plants and children do as they get bigger.
3. A hard, solid part of the Earth; it cannot move or grow.
5. The invisible gas all around us that we breathe.
6. The hot, bright star that gives Earth light and heat.
7. living things can usually do, like run or walk.
8. A green thing that needs water and light to grow.

**Down**

2. You need to drink this; it flows and has no shape.
4. A machine that takes people places, but doesn't breathe.
5. A living thing that can move and eat other things.
6. The brown or black dirt where plants often grow.
