

Parrots

Parrots are the **most** popular pet birds in the world. They are smart and very social. They live a long life; some parrot species can live **(1)**

over 80 years. They have colourful feathers and curved beaks. There are **(2)**

different kinds of parrots and most of them live in tropical areas. Most parrots **(3)**

seeds. Others may eat fruit, flowers

(4) small insects. Some types of parrot, such as the African grey parrot, are good **(5)** copying human's voices.
