Hello! My name is Romeo. My family and i are currently on vacation in bedugul, Bali. I wanted to share with you about a unique fruit that I am eating here called 'buah salju' or ice cream bean. The fruit originally comes from the amazon forest but is easy to find in bedugul.

The fruit has a yellowish skin and white, soft flesh like ice cream. It tastes sweet and has a cool feeling in the mouth. Eating the fruit is good for our body because it has a lot of antioxidants that can help strengthen our immune system. It also has substances that can help fight inflammation, treat headaches and reduce the risk of cancer.

9. How does the fruit taste?

10. Why is the fruit good for our body?
