infrastructure		accommodation	conserve

Tourism plays a vital role in many countries' economies, but it can also have serious effects on the environment if not managed properly. Popular destinations often face problems such as pollution and _____, especially when people_____ their responsibility to protect nature. When visitors fail to care for natural areas, wildlife and _____ can be put at great risk.

Many governments now try to _____ tourism activities to make sure they are _____. They encourage tourists to buy _____ and handmade _____instead of imported goods, as this helps_____ local traditions and supports the community. Choosing small, family-run _____ instead of a large international_____ is another way to travel responsibly.

Conservation organizations also work hard to _____ natural habitats through various conservation projects. These programs aim to protect forests, rivers, and coastal areas so that future generations can enjoy them too.

However, tourism development requires good _____, such as roads, waste treatment systems, and a stable _____. Without these, even the best intentions can fail.

In the end, responsible tourism is about finding a balance. By making careful choices and respecting the environment, travelers can help preserve nature while still enjoying the beauty and culture of their destinations.
