QUIZ Unit 9

Complete the dialogues with the correct form of the verbs in parentheses.

1 A: What would you do if your best friend _____ (lie) to you?

B: I _____ (ask) him why he felt he needed to lie to me.

2 A: Do you regret anything from the time you were a professional athlete?

B: Well, if I _____ (focus) so much on winning, I _____ (have) more fun, for sure.

3 A: If you _____ (find) a wallet on the floor, would you try to return it?

B: Of course! I _____ (look for) an ID card and try to contact the person.

4 A: If you _____ (know) about this problem, would you have done anything differently?

B: Well… I guess I _____ (do) some more research before making a decision.

1. A, B (0.25 points)

_____

2. A, B (0.25 points)

_____

3. A, B (0.25 points)

_____

4. A, B (0.25 points)

_____

5. One of the issues that the leaders discussed was how companies can develop more _____ (sustain) practices. (0.25 points)

_____

6. If people had recycled more in the past, we _____ so much plastic waste now. (0.25 points)

LIVEWORKSHEETS

- won't have
- don't have
- wouldn't have
- didn't have

7. **Complete the sentences by using the words in parentheses with the correct suffix.** (0.25 points)

   Our current fishing practice is an _____ (ecology) disaster. We can't just take all the fish we want from the sea!

   _____

8. We need to manage our resources wisely so that future generations are protected against _____ (environment) problems. (0.25 points)

   _____

9. The city authorities have presented an ambitious program to use only _____ (renew) energy in the near future. (0.25 points)

   _____

10. The government is planning new laws to reduce air _____ in big cities. (0.25 points)

- pollute
- polluting
- polluted
- pollution

Complete the paragraph with the words/expressions from the box.

Biodiversity	climate change	greenhouse effect	Ice caps	pollution

Our planet is facing many environmental challenges today. One of the most serious is (1) _____, which is caused mainly by the release of (2) _____ such as carbon dioxide and methane into the atmosphere. These gases trap heat, leading to rising global temperatures.

As a result, the (3) _____in the Arctic and Antarctic are melting, causing sea levels to rise. This not only threatens coastal cities but also affects animals that depend on these icy environments.

Another major problem is (4) _____, which contaminates air, water, and soil, harming living organisms and ecosystems. All these issues combined put enormous pressure on (5) _____, the variety of life on Earth, which is essential for a healthy and balanced planet.

LIVEWORKSHEETS

11. 1. (0.2 points)

12. 2. (0.2 points)

13. 3. (0.2 points)

14. 4. (0.2 points)

15. 5. (0.2 points)

Over the past century, climate change has become one of the biggest challenges for humanity. The increase of greenhouse gases in the atmosphere has caused global temperatures to rise, leading to the melting of ice caps and extreme weather events. This affects biodiversity, as many animals lose their natural habitats.

At the same time, human pollution continues to damage the air, water, and soil. If governments had taken action earlier, we wouldn't be facing such serious environmental problems today. However, if people make small changes now, the future could still improve. Protecting nature is everyone's responsibility.

16. Climate change is caused mainly by an increase in greenhouse gases. (0.25 points)

- True
- False

17. The melting of ice caps helps animals find new habitats. (0.25 points)

- True
- False

18. Pollution affects the air, water, and soil (0.25 points)

- True
- False

19. If governments had acted earlier, the problems would be worse now. (0.25 points)

- True
- False
