8. This is the house (which / who) my parents built.

D. Reading Comprehension (1 text + 3 tasks = 12 pts)

Read the text and answer the questions.

The Plastic Problem

Every year, people produce over 300 million tonnes of plastic. Much of it ends up in the oceans, where it causes serious harm to marine life. Sea turtles, whales and seabirds often mistake plastic for food and die after eating it. Scientists are working on ways to reduce plastic pollution. Some countries have banned single-use plastic bags and bottles, while others are developing biodegradable materials. However, experts say that the most effective solution is to change our habits — use less plastic and recycle more.

1. Multiple choice (4 pts)

1. Where does a lot of plastic end up?
a) in the forests b) in the oceans c) in the air
2. What happens to animals that eat plastic?
a) They get sick or die b) They become stronger c) They escape pollution
3. What have some countries banned?
a) Cars b) Plastic bottles and bags c) Recycling centres
4. What is the best long-term solution according to experts?
a) Use more plastic b) Produce more materials c) Change our habits

2. True or False (4 pts)

1. Scientists are trying to find ways to increase plastic use. _____
2. Sea turtles can confuse plastic with food. _____
3. Some countries are working on biodegradable materials. _____
4. Recycling is not mentioned as a solution. _____

3. Complete the sentences (4 pts)

1. Over _____ tonnes of plastic are produced each year.
2. Plastic pollution harms _____ life.
3. Some countries banned _____.
4. Experts say we should use _____ and recycle more.
