Hi Ain,

How are you? Remember you have asked me about organic gardening and its benefit? So now I'm going to (0) sharing with you. No matter where you go today, people are talking about organic food. Organic gardening is the best way (1) from home gardening. It is an environmentally friendly way of gardening. Organic gardening (2) having lots of advantages. Firstly, organic gardening provides delicious chemical-free food while (3) respects the environment. An organic garden is free from toxic chemicals (4) such chemical fertilisers, pesticides and herbicides. The organic food items are rich (5) on nutritional values. Secondly, organic gardening uses less natural resources especially water. The soil is fertilised through composting. This is good (6) to the environment (7) until less waste is discarded. Furthermore, planting your own organic vegetable garden will (8) saving your money. That is something we all want to do. By growing your own vegetables, you will save money at the store and also can get a sense of fulfilment from harvesting your own garden. Happy gardening!
