Name: Date:

Rounding Numbers to the Nearest 10

Whole numbers				
Objective	To round up numbers up or down			
Success Criteria	Look at the number	If it ends in 5, 6, 7, 8 or 9, round up	If it ends in 4, 3, 2, or 1, round down	Write number to nearest 10
Outcomes	I can identify the value of a number by its place (e.g. H, T, U)			
	I can round numbers up to the nearest 10			
	I can round numbers down to the nearest 10			
Emerging	Initial Development		Extended Development	Secure
Teacher Comment:				

Example:

a. Circle the nearest 10 to 36 and write the answer   40 [36 is nearer to 40 than 30].
30   31   32   33   34   35   **36**   37   38   39   **40**
The answer is 40 [36 is nearer to 40 than 30]

b. Circle the nearest 10 to 33 and write the answer

30   31   32   **33**   34   35   36   37   38   39   40
The answer is 30 [33 is nearer to 30 than 40]

1. Circle the nearest 10 to **16** and write the answer

10	11	12	13	14	15	16	17	18	19	20

The answer is

2. Circle the nearest 10 to **7** and write the answer

0	1	2	3	4	5	6	7	8	9	10
The answer is

3. Circle the nearest 10 to **53** and write the answer

50	51	52	53	54	55	56	57	58	59	60
The answer is

4. Circle the nearest 10 to **44** and write the answer

40	41	42	43	44	45	46	47	48	49	50
The answer is

5. Circle the nearest 10 to **58** and write the answer

50 51 52 53 54 55 56 57 58 59 60
The answer is

6. Circle the nearest 10 to **99** and write the answer

90 91 92 93 94 95 96 97 98 99 100
The answer is

7. Circle the nearest 10 to **68** and write the answer

60 61 62 63 64 65 66 67 68 69 70
The answer is

8. Circle the nearest 10 to **75** and write the answer.

70 71 72 73 74 75 76 77 78 79 80

The answer is
