A SPRINGFIELD EARTH DAY

April 22 is Earth Day, a celebration of what our planet offers us and a chance to give something back. After all, it has become widely accepted that the amazing resources our planet offers us are not unlimited and that we have to take action to conserve our ecosystems and prevent the destruction of the environment.

Here in Springfield, residents of all ages will be joining in the global event and will 'go green'. Green Park is one of Earth Day's main venues, hosting practical conservation events. Everyone will have the chance to get involved in tree planting and composting, but that's not all. Springfield Earth Day promises entertainment and games for the whole family. There is no admission charge, but if you wish to make a donation, please contact us at earthday@springfieldtown.com

Subject: Re: Questions about Earth Day

Dear Mr Mane,

Thank you for your enquiry about organising a workshop at the Earth Day Celebration. We absolutely agree with your opinion that birds play a significant role in keeping the balance of the ecosystem and should be honoured on this day. Therefore, we are very interested in your proposal 'How to build a bird feeder from a plastic bottle' and are considering Spring Valley Park as a suitable venue.

We would appreciate it if you could send us a short CV telling us your experience with public events and an outline of your plan. This is so we can put our minds at ease that we are offering events which are enjoyable, informative and safe.

Springfield Recycling Plant has offered to provide the plastic bottles for the workshop. Will you be providing any other needed equipment? Could you also inform us about the number of people you are planning on working with in each group?

I hope to hear from you soon.

Yours sincerely,

Kevin Vine

Earth Day Organiser and member of the Springfield Town Council

C**Fay Rogers**

My grandmother always spent a lot of time in the garden. So, as a child I assumed that gardening was something the elderly did to pass their time. That was up until I got married and moved to Springfield with my husband. We bought a house with a nice back garden. Not knowing how to look after it properly, it soon turned into a bunch of dried up plants and trees. Luckily, I decided to take part in some of the Earth Day Celebration workshops here in Springfield. I was expecting to get a few gardening tips, but to be honest I got more than that! The compost workshop was the best. Some people complained that it covered too much ground, but not I. I learned to make my own compost and how to use it properly and before I knew it my garden thrived. As you can understand, I am very much looking forward to this year's Earth Day workshops!
