

LIONS

Lions are the second **largest** type of cat in the world, only behind tigers. Unlike **(1)** cats, lions are very social animals. They live in groups, called prides, of around 30 lions. They usually hunt **(2)** night and their prey includes buffaloes, zebras, young elephants, rhinos, hippos, crocodiles and giraffes. But sometimes they eat **(3)** prey like mice, birds, hares, lizards and tortoises. Lions sometimes behave like your cat at home. **(4)** are very good climbers and are often seen up in trees. They are considered the laziest of the big cats because they spend 16 to 20 hours **(5)** the day sleeping.
