THE MONARCH BUTTERFLY

This amazing butterfly is easily seen by its orange and black colors. Unfortunately, one of the last areas of the monarch butterfly may soon be gone. The place is in Pacific Grove, California. That town calls itself Butterfly U.S.A.

In this town, there is a woman who has a wild garden where the butterflies like to live. She wants to sell it to a building company that is interested in building homes, but the city doesn't want her to do this, because the butterflies will not have a home. Instead, people from the town would like to make it a place just for butterflies, but they cannot do this because they don't have money to pay for it.

Millions of butterflies have followed the same paths for thousands of years. They start their trip in Mexico and return to California to leave their eggs in the trees. They go to Pacific Grove to find the right temperature and stay warm.

The monarch butterfly is the symbol of Pacific Grove. Many people come to the city each year to see them. The money these visitors bring is very important for the town. Some people say that more butterflies used to come; not as many come now, so they think all of the new buildings will make the monarch butterflies disappear from this area.
