

Reading Comprehension Activity:

Unusual Houses Around the World 1

People live in all kinds of houses, and some of them are truly unique. Let's take a look at some of the most unusual houses from different parts of the world.

The Treehouse, Costa Rica

Imagine living in a house built in the trees! In Costa Rica, some people build their homes high above the ground, surrounded by nature. These houses are made from wood and are designed to blend in with the forest. People who live in these houses enjoy waking up to the sounds of birds and feeling the fresh breeze of the forest. It's the perfect home for someone who loves nature.

The Ice Hotel, Sweden

In Sweden, there is a hotel made entirely of ice and snow! Every winter, the Ice Hotel is rebuilt from scratch using frozen blocks of ice taken from a nearby river. The walls, beds, and even the furniture are made of ice. People come from all over the world to stay in this magical winter wonderland. The Ice Hotel melts in the spring and has to be rebuilt every year.

The Hobbit Houses, New Zealand

If you are a fan of "The Lord of the Rings," you will love the Hobbit houses in New Zealand. These small, cozy homes are built into the hills, just like in the movie. The round doors and windows make the houses look charming and warm. They are built using natural materials and blend perfectly with the green hills around them. Some people even live in them year-round!

The Floating Houses, Netherlands

In the Netherlands, some people live in houses that float on water. These houses are built on platforms and move up and down with the water level. This is a great solution for a country that has a lot of rivers and canals. Floating houses provide a unique living experience and allow people to be close to water every day.

Part 1: True or False

Read the statements below and decide whether they are **True** or **False**.

1. People in Costa Rica build treehouses from stone. _____
2. The Ice Hotel is rebuilt every year. _____

3. Hobbit houses are only found in movies. _____
4. Floating houses in the Netherlands can move up and down with the water level. _____
5. The Ice Hotel is built from ice taken from the sea. _____

Part 2: Multiple Choice Questions

Choose the correct answer.

6. Where are the Hobbit houses located?
 - a) Sweden
 - b) Costa Rica
 - c) New Zealand
 - d) Netherlands
7. What material is the Ice Hotel made from?
 - a) Wood
 - b) Ice and snow
 - c) Stone
 - d) Metal
8. Why do people build treehouses in Costa Rica?
 - a) To avoid wild animals
 - b) To live close to nature
 - c) To keep warm during winter
 - d) To escape floods
9. What is special about floating houses in the Netherlands?
 - a) They are built underground
 - b) They can float on water
 - c) They are made of glass
 - d) They are built in the forest

Reading Comprehension Activity #2: Unusual Houses Around the World

Read the text carefully.

The Cave House, Turkey

In the region of Cappadocia, Turkey, some people live in homes carved into the soft rock of mountains. These cave houses have been around for centuries and are surprisingly comfortable. The thick rock walls keep the homes cool in the summer and warm in the winter. People living here enjoy a peaceful life with beautiful views of the rocky landscape.

The Capsule Tower, Japan

Tokyo, Japan, is home to a very unusual building called the Nakagin Capsule Tower. It is made up of tiny, self-contained "capsules" that serve as individual apartments. Each capsule has just enough room for a bed, a small bathroom, and a few storage spaces. The tower was designed to be a futuristic solution for urban living in the busy city.

The Earthship, USA

In New Mexico, USA, some people live in houses called "Earthships." These homes are made from recycled materials like old tires and bottles. Earthships are designed to be eco-friendly and use solar energy for electricity. They are also built to stay cool in the summer and warm in the winter without using much energy. People who live in Earthships often grow their own food and collect rainwater for daily use.

The Transparent House, Japan

Another unusual home in Japan is the "Transparent House" in Tokyo. This house has glass walls, so people inside can see everything outside, and vice versa! It was designed to let in lots of natural light, but it's definitely not a house for someone who wants privacy. The Transparent House is a bold example of modern architecture.

Part 1: True or False

Read the statements below and decide whether they are True or False.

1. Cave houses in Turkey are carved into soft rock. _____
2. The Nakagin Capsule Tower is known for its large and spacious rooms. _____
3. Earthships are made from recycled materials. _____
4. People who live in Earthships often collect rainwater. _____
5. The Transparent House is located in the countryside. _____

Part 2: Multiple Choice Questions

Choose the correct answer.

1. What helps cave houses in Cappadocia stay comfortable throughout the year?
 - a) Air conditioning
 - b) Thick rock walls
 - c) Solar panels
 - d) Large windows
2. Where can you find the Nakagin Capsule Tower?
 - a) Tokyo, Japan
 - b) New York, USA
 - c) Cappadocia, Turkey
 - d) New Mexico, USA
3. Why are Earthships considered eco-friendly?

- a) They are made from natural stone
 - b) They use recycled materials and solar energy
 - c) They are built underground
 - d) They use wind energy
4. What is special about the Transparent House in Tokyo?
- a) It is made from wood
 - b) It has glass walls
 - c) It floats on water
 - d) It is underground

Reading Comprehension Activity: "Unusual Houses" 3

Strange but Cool Homes!

Read the text carefully.

People live in different kinds of homes all over the world. Some houses are very unusual and creative! Let's learn about a few cool homes that you won't find in every city.

The Stone House, Portugal

In Portugal, there is a house that looks like something from a storybook. The Stone House is built between two large rocks! The owners used stone to build the walls, roof, and even the stairs. The house looks very strong and blends into the natural landscape. It's a quiet place to live, away from the busy city.

The House on Wheels, USA

Some people in the USA live in "tiny houses" on wheels. These houses are very small, but they have everything you need — a bed, a kitchen, and a bathroom. The best part is that you can move your house to different places. It's like going on vacation all the time! People who live in these houses like the freedom to travel and explore new places.

The Underground House, Australia

In the hot desert of Australia, people sometimes build their homes underground! These homes are cool in the summer and warm in the winter. Living underground helps protect people from the extreme weather. The homes have windows, electricity, and everything else you'd find in a regular house, but they are hidden from sight.

The Boat House, Thailand

In Thailand, some people live in houses built on boats. These floating homes move gently on the water, and people can fish right from their front porch! It's a peaceful way to live, close to nature. Many families live in boat houses and travel along the rivers.

Part 1: True or False

Read the sentences below and decide if they are **True** or **False**.

1. The Stone House in Portugal is built between two rocks. _____
2. The House on Wheels is always in one place. _____
3. Underground houses in Australia protect people from extreme weather. _____
4. People living in boat houses can catch fish from their homes. _____
5. The Stone House is located in Australia. _____

Part 2: Choose the correct answer.

1. Where is the Stone House located?
 - a) Australia
 - b) USA
 - c) Portugal
 - d) Thailand
2. Why do some people in the USA live in tiny houses on wheels?
 - a) They like moving to new places
 - b) They want a bigger house
 - c) They are afraid of storms
 - d) They live in the desert
3. What is special about underground houses in Australia?
 - a) They are very tall
 - b) They stay cool in hot weather
 - c) They have glass walls
 - d) They float on water
4. How do people living in boat houses in Thailand spend their time?
 - a) Traveling by car
 - b) Fishing and living on the water
 - c) Building large homes
 - d) Working in big cities
