

Phrasal Verbs about Hobbies

A. Read the text about someone's hobbies and underline ten phrasal verbs.

When I was in high school, I took part in a band. It all started because my friends and I played instruments and when we used to hang out, we would play some of our favourite songs together. My best friend came up with the idea of starting a band, which I was keen on. I played in the band for five years but once I started university, it was hard to keep up with the practice sessions so I had to give it up. Throughout university, I didn't have much free time so I took up a few small hobbies just for fun. I did some photography and scrapbooking, which I really enjoyed because now I have a lot of memories from my university days. I still do some photography on the side but I've always been into music and I missed that part of my life. I've had a bit more time now that I've graduated university so I convinced myself to get back into music. I decided to have a go at electronic music because, like photography and scrapbooking, I can do this hobby on my own time around my work schedule.

B. Write down the ten phrasal verbs from the text in the present tense and then match each one with a suitable meaning.
