

TASK 1: Read the text below and fill each gap with one of the following words

imminent – apparent – prominent – convenient – eminent – permanent

The Changing Face of the City

Over the past decade, the skyline of Riverton has changed dramatically. Once a quiet industrial town, it has now become home to several international corporations and a thriving creative sector. For anyone who's visited Riverton in the past, the transformation is _____ **(1)**: Towering glass buildings, newly renovated public spaces, and bustling streets make it immediately clear that the city has undergone a major economic and cultural shift.

Among those who helped shape this new identity was Dr. Elena Marquez, a(n) _____ **(2)** urban planner whose visionary ideas inspired the city's latest regeneration project. Her proposals emphasized sustainability, accessibility, and community-centered design — principles that many experts now regard as essential for modern urban life.

However, not everyone welcomed the rapid pace of change. For long-time residents, the demolition of historic neighborhoods signaled a(n) _____ **(3)** loss of cultural heritage. Despite official promises that new buildings would preserve the city's character, critics argued that the damage was already done.

The new public transport system, on the other hand, has been widely praised for being both efficient and _____ **(4)**. It allows commuters to travel across the city in record time and has reduced congestion by nearly forty percent.

Local businesses have also benefited from partnerships with _____ **(5)** figures in architecture and technology, whose influence has drawn global attention to Riverton's development.

Still, concerns remain about whether the changes will lead to a _____ **(6)** improvement in quality of life or simply a temporary boom driven by investment. Only time will tell whether the city's growth will endure — or fade as quickly as it began.

TASK 2: Select the correct word from the list to complete each sentence.

1. The engineer discovered that the circuit board was _____, which explained why the device failed during testing.
 - a) inventive
 - b) defective
 - c) predictive
 - d) informative

2. The report provided an _____ analysis of the company's finances, leaving no aspect unexamined.
 - a) exhaustive
 - b) innovative
 - c) destructive
 - d) prospective
