Questions 21–26

Choose the correct answer.

RESEARCH PROJECT

21 How did John choose the topic of his research project?

He thought the information would be useful for town planning.

He has a special interest in the use of public services.

He read about a similar study which had been done earlier.

22 During his research, John is expecting to find that

The use of public services has altered very little.

A group of people has changed its habits.

The most frequently used facility is the library.

23 What is the problem with using official records?

They may be lacking in detail.

They may not be readily available.

They may be difficult to analyse.

24 What does the tutor think about John using a questionnaire to get information?

He needs to do a course in questionnaire design first.

He should use this method instead of looking at public records.

He will find the practice he gets useful the following year.

25 Which new variable does John agree to add to his investigation?

occupation

income group

qualifications

LIVEWORKSHEETS

26 How many questionnaires will John distribute?
