Exercise 4: Cho dạng đúng của các từ trong ngoặc để tạo thành một bài IELTS Writing Task 1 hoàn chỉnh.

The line graph (1-compare)_____the average price of a barrel of oil with the food price index over a period of 11 years.

It is clear that average global prices of both oil and food rose considerably between 2000 and 2011. Furthermore, the trends for both commodities (2-be) _____very similar, and so a strong correlation (93.6%) is suggested.

In the year 2000, the average global oil price (3-be)_____close to $25 per barrel, and the food price index stood at just under 90 points. Over the following four years both prices remained relatively stable, before rising steadily between 2004 and 2007. By 2007, the average oil price had more than doubled, to nearly $60 per barrel, and food prices (4-rise)_____by around 50 points.

A dramatic increase in both commodity prices was seen from 2007 to 2008, with oil prices reaching a peak of approximately $130 per barrel and the food price index rising to 220 points. However, by the beginning of 2009 the price of oil had dropped by roughly $90, and the food price index was down by about 80 points.

Finally, in 2011, the average oil price (5-rise)_____once again, to nearly $100 per barrel, while the food price index reached its peak, at almost 240 points.
