

Task 1: Fill in the blanks with the correct words from the box:

automate – cooperation – breakthrough – innovation – diversity – robotics

1. ASEAN promotes cultural _____ among its member states.
2. A recent medical _____ has helped save thousands of lives.
3. Many factories now use _____ to make production faster.
4. International _____ is important for economic development.
5. New technological _____ change the way students learn every day.

Task 2: Choose the correct answer

1. ASEAN encourages student _____ together for peace.
A. work B. to work C. working
2. More and more robots _____ in factories these days.
A. are used B. used C. use
3. She said that ASEAN _____ many benefits to young people.
A. brought B. brings C. would bring
4. Technology _____ to transform education in the near future.
A. is expected B. expects C. expected
5. One of the main goals of ASEAN is _____ cultural heritage.
A. preserve B. to preserve C. preserving

Task 3: Listen and fill in the blanks

“Good morning everyone. Today we’re going to talk about the role of technology and ASEAN in modern education.

ASEAN helps promote cultural _____ and cooperation among Southeast Asian countries.

Meanwhile, new technologies such as _____ intelligence and online learning are changing how students study.

With these _____, students can now access lessons anytime and anywhere.

In the future, exchange programs between ASEAN countries will help students _____ their skills and experience different cultures.”

Task 4: Read the text and answer the questions:

Both ASEAN cooperation and modern technology are key elements in shaping the future of young people in Southeast Asia. ASEAN promotes unity among its member nations through cultural exchange, education programs, and scholarship opportunities. These programs allow students to study abroad, learn more about the region, and build long-term relationships.

At the same time, science and technology—especially artificial intelligence (AI), robotics, and automation—have become essential in every aspect of life.

Schools are now using AI to analyze students’ performance and customize lessons for each learner. Robotics and engineering clubs encourage young

people to be creative and solve real-life problems.

The combination of ASEAN cooperation and technological development prepares students not only to become global citizens but also to become leaders in innovation and cultural understanding.

Questions:

1. What does ASEAN promote among its member nations?

→

2. How do scholarship programs benefit students?

→

3. What is AI used for in schools?

→

4. Why are robotics clubs useful for students?

→

5. What is the main idea of this text?

A. ASEAN helps promote peace only.

B. Technology improves students' learning.

C. ASEAN and technology create opportunities for the young generation.

Task 5: Write a paragraph (100–120 words).

Topic: “*How does ASEAN and technology influence young people's future?*”

Use these questions to guide your writing:

1. How does ASEAN help students?
2. Do exchange programs improve your language and soft skills?
3. What new technologies do students often use now?
4. How can modern technology support education?
5. Why is it important to combine culture and technology in the future?

.....
.....
.....
.....

.....

.....

.....

.....

.....

.....

.....

.....

Task 6: Record your voice and answer all of these questions (60-90s):

1. What do you know about ASEAN and its goals?
2. Can you name one benefit that ASEAN brings to students?
3. What modern technology do you use every day for studying?
4. Do you believe that robots or AI will replace teachers in the future?
Why/why not?
5. Why is learning from different cultures important for young people?
