

I. Reading Comprehension: Analytical Exposition Text

Text for questions 1-5:

Is Technology Harming Human Connections?

(1) The omnipresence of digital devices has fundamentally changed how we interact. While technology promises greater global connectivity, it is arguably eroding the quality of real-world, face-to-face human connections. This essay argues that excessive reliance on technology is detrimental to our social skills and emotional well-being.

(2) Firstly, technology creates physical isolation. People often prefer communicating through screens rather than meeting in person. In public spaces, such as cafes or parks, it is common to see individuals sitting together yet absorbed in their phones. This distraction prevents genuine conversation and shared experience, leading to a superficial sense of companionship.

(3) Secondly, digital communication lacks the depth of non-verbal cues. Face-to-face interactions rely heavily on body language, tone of voice, and facial expressions—cues that are often lost or misinterpreted in text messages and emails. This lack of nuance leads to misunderstandings and hinders the development of true empathy and deep emotional connection.

(4) In conclusion, while technological advancements are inevitable, their current usage patterns pose a serious threat to the fabric of human social life. It is crucial that we consciously limit screen time and prioritize genuine, uninterrupted interactions to maintain healthy social relationships.

-
1. What is the **main idea** of paragraph (2)?
 - A. Technology offers faster communication methods.
 - B. Public spaces should ban smartphone usage.
 - C. Technology encourages physical separation and prevents genuine interaction.
 - D. People enjoy using their phones in cafes and parks.
