

РІВНЯННЯ ВИДУ $x - (40 + 10) = 30$

1) $x - (40 + 10) = 30$

$x - 50 = 30$

$x = 30 + 50$

$x = \square\square$

$\square\square - (40 + 10) = 30$
 $\square\square - \square\square = \square\square$
 $\square\square = \square\square$

$x + (25 - 10) = 21$

$x + \square\square = 21$

$x = 21 - \square\square$

$x = \square$

$\square + (25 - 10) = \square\square$
 $\square + \square\square = \square\square$
 $\square\square = \square\square$

2) $x + (37 - 7) = 55$

$x + 35 : 5 = 61$

3) $(54 + 12) - x = 20$

$(70 - 33) + x = 88$

4) $(29 + 39) - x = 19$

$(40 + 32) : x = 9$
