#### The History of Sunglasses

People have worn sunglasses since the 12<sup>th</sup> century or possibly earlier. People made the first sunglasses out of flat pieces of smoky quartz. They protected the eyes from bright lights but they didn't help people to see better or protect them from the sun. Judges in Chinese courts used these sunglasses to hide their expressions when they interviewed witnesses.

In the early 1900s, Hollywood film stars wore sunglasses but it wasn't until 1929, when Sam Foster introduced sunglasses to America that people made sunglasses in large quantities for the public. People used these sunglasses to protect their eyes from the sun's rays.

Traditionally people have made the frames of sunglasses out of plastic or metal but today people use other materials like bamboo or rosewood. What is certain is that sunglasses will always be considered fashionable.
