

- 1 Aplica las propiedades conmutativa y asociativa, y comprueba que obtienes el mismo resultado.

• $(3 + 7) + 6 = 3 + (\dots + \dots)$

• $6 + (8 + 5) = (\dots + \dots) + \dots$

• $(5 + \dots) + 9 = 5 + (2 + \dots)$

• $\dots + (4 + 2) = (7 + \dots) + 2$

- 2 Calcula.

• $4 \times 6 - 3 \times 5$

• $9 - 3 + 4 \times 2$

• $8 + 5 \times 6 - 7$

• $15 - 2 - 2 \times 4$

• $19 + 2 \times (3 + 2)$

• $18 - 3 \times (9 - 6)$

- 3 Piensa y averigua el número que falta.

• $(5 + \bigcirc) \times 2 = 16$

• $(6 + \bigcirc) \times 5 = 45$

• $(7 + \bigcirc) \times 6 = 66$

• $(9 - \bigcirc) \times 8 = 56$

• $(15 - \bigcirc) \times 9 = 63$

• $(12 - \bigcirc) \times 6 = 60$
