- 6- If you can't sleep at night, you should drink some warm tea. (TRY)

- 7- Ann felt ill but insisted on going to work. (DESPITE)

POSITIVE AND NEGATIVE ASPECTS OF SOCIAL MEDIA

Social media has become an integral part of modern life, influencing the way we communicate, share information, and interact with the world. Platforms such as Facebook, Instagram, Twitter, and TikTok have millions of users worldwide, making them powerful tools for connection and expression.

One of the key benefits of social media is its ability to connect people across vast distances. Friends and family members who live far apart can stay in touch easily, sharing updates and photos in real-time. Social media also provides a platform for individuals to express their opinions and engage in discussions on various topics, ranging from politics to entertainment.

However, the use of social media is not without its drawbacks. One major concern is the impact on mental health. Studies have shown that excessive use of social media can lead to feelings of anxiety, depression, and loneliness. This is often due to the tendency to compare oneself to others, as social media profiles typically showcase the best aspects of people's lives, creating unrealistic standards.

Another issue is the spread of misinformation. Social media platforms can easily become a breeding ground for fake news and false information, which can have serious consequences. For instance, during the COVID-19 pandemic, false information about the virus and vaccines spread rapidly on social media, leading to confusion and mistrust among the public.

Despite these challenges, social media has also been a catalyst for positive change. It has been used to organize social movements, raise awareness about important issues, and mobilize support for various causes. Examples include the #MeToo movement and climate change activism, where social media played a crucial role in spreading awareness and rallying people together.

In conclusion, while social media offers significant benefits in terms of connectivity and information sharing, it is important to use it responsibly and be aware of its potential negative effects.

Task A: Circle *T* for true and *F* for false.

1- Social media has encouraged hostile debate and confrontation among users worldwide.

T	F
---	---

2- Excessive use of social media is linked to improved mental health.

T	F
---	---

3- Social media contributed favourably to the #Me Too movement.

T	F
---	---

Task B: Find the words in the text which mean:

4- The negative part of a situation.

5- It moves easily and quickly affecting many people.
