

1. If the crew ____ (notice) the leak earlier, the incident ____ (avoid).
2. If the weather ____ (improve) earlier, the flight ____ (depart) on time.
3. If the sensor ____ (work) correctly, the warning ____ (not activate).
4. If the pilots ____ (receive) the report on time, they ____ (choose) another route.
5. If we ____ (start) the descent earlier, we ____ (not enter) the clouds.
6. If ATC ____ (give) clearance earlier, we ____ (take off) earlier.
7. If the system ____ (not fail), the flight ____ (continue) without delays.
8. If they ____ (check) the oil level, the engine ____ (not overheat).
9. If an alternate runway ____ (be) available, we ____ (not go around).
10. If the crew ____ (know) about the turbulence, service ____ (not start).
11. If the fuel pump ____ (not fail), we ____ (reach) our destination.
12. If the calculations ____ (be) more accurate, we ____ (not exceed) the weight limit.
13. If the speed ____ (be) lower, the aircraft ____ (not overrun) the runway.
14. If they ____ (apply) the brakes earlier, the distance ____ (be) enough.
15. If ATC ____ (warn) us, we ____ (change) altitude.
16. If it ____ (not be) for the navigation error, they ____ (not deviate) from the route.
17. If the runway lights ____ (be) visible, the landing ____ (take place).
18. If the passenger ____ (fasten) the seatbelt, he ____ (not be injured).
19. If the crew ____ (receive) an accurate METAR, they ____ (not expect) clear skies.
20. If we ____ (use) another altitude, we ____ (avoid) the turbulence.
