

I watch train documentaries every weekend.

My best friend collects photos of old steam locomotives.

The express train usually arrives at this station at 7 p.m.

Many people think high-speed trains are the future of travel.

I often read blogs about train engineering.

I am saving money for a trip on a famous mountain railway.

My brother is building a model train set in his room right now.

We are planning a visit to a modern train control center.

The new electric train is gaining a lot of attention online.

I am learning how train signals work.

Last summer, I traveled on the fastest train in the country.

I met an engineer who worked on the old diesel engines.

We visited a railway museum and took hundreds of photos.

My dad bought me a detailed book about bullet trains.

The train suddenly stopped because a deer crossed the track.

I was watching a train video when my friend called me.

The passengers were waiting on the platform while the crew fixed a small problem.

We were riding through the mountains when it started to snow.

I was reading about steam engines when the power went out.

The old locomotive was shaking a lot as it climbed the hill.
