All About Dinosaurs

Reading and Comprehension Questions

Dinosaurs lived on Earth millions of years ago. They were alive before there were any people. There were lots of different types of dinosaurs. Some dinosaurs were plant eaters and some dinosaurs were meat eaters. Dinosaurs were different sizes too. Some were as small as a chicken but others were bigger than a double-decker bus!

Stegosaurus were large dinosaurs that only ate plants. They were very big but their brains were the same size as a dog's.

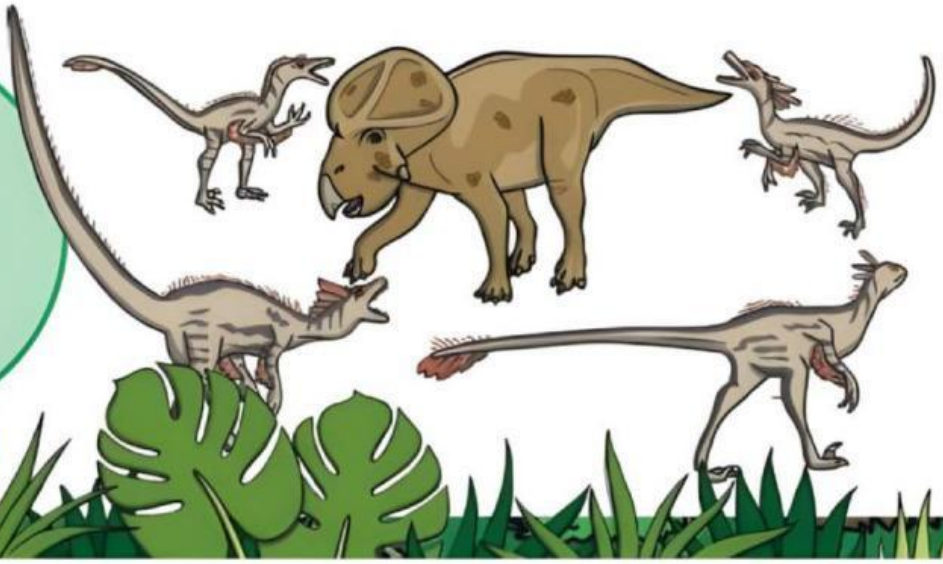

Tyrannosaurus Rex were also very big dinosaurs. They ate other dinosaurs and could even crush their bones!

Oviraptor were smaller dinosaurs that ate meat, eggs, seeds, insects and plants. They had feathers and a powerful jaw.

Velociraptor weighed about 15kg and ate small dinosaurs or other animals. They also had feathers but they couldn't fly!

LIVEWORKSHEETS
