Smart Classrooms: A New Way of Learning

In the past year, many schools have decided to modernize their classrooms by introducing new technology. Teachers started using tablets so students could read, research, and complete exercises in a more interactive way. The school also installed digital interactive boards to make lessons more dynamic and engaging. These changes helped many students participate more actively during class. As a result, teachers noticed that students were improving their learning skills and becoming more motivated.

Even though technology brought many advantages, the transition was not completely easy. Some teachers struggled to use the new devices because they needed extra training. A few students also felt more comfortable with traditional notebooks instead of screens. To support everyone, the school organized several workshops where teachers and students could practice using the digital tools. By the end of the school year, most people felt more confident and positive about the changes.

Choose the correct answer.

1. Why did the school introduce new technology?

a) To replace all teachers
b) To make learning more interactive
c) To reduce class time
d) To make students use fewer materials

2. What tool did teachers start using with their students?

a) Smartphones
b) Typewriters
c) Tablets
d) Cameras

3. Why did some teachers struggle with the new devices?

a) They didn't like technology
b) They needed more training
c) The devices were too old
d) There weren't enough classrooms

4. What did the school do to help teachers and students adapt?
a) Organized workshops
b) Took away all tablets
c) Asked parents to teach the classes
d) Stopped using digital boards

Write True or False.

1. The school installed digital boards to make lessons more engaging.
2. All students preferred using tablets instead of notebooks.
3. Teachers noticed positive changes in student motivation.

Write True or False.

1. Some teachers found the transition difficult at first.
2. Students used tablets to complete class exercises.
3. The school removed the interactive boards after a short time.

Write True or False.

1. The school organized workshops to help everyone adapt to technology.
2. All teachers already knew how to use the devices perfectly.
3. By the end of the year, most people felt more confident with the new tools.

Match the beginning with the correct ending.

A. Teachers used.	1. Lessons more dynamic
B. Students completed.	2. tablets during class
C. Digital boards made.	3. exercises more interactive

Match the beginning with the correct ending.

A. Some teachers needed.	1. workshops for training
B. A few students preferred.	2. traditional notebooks
C. The school organized.	3. extra support

Match the beginning with the correct ending.

A. New technology helped.	1. more motivated to learn
B. Students became.	2. improvements in learning skills
C. Many teachers observed.	3. classrooms feel more modern
